

DryMax Comfort

DryMax Comfort is a superabsorbent non-sterile bed/table pad.

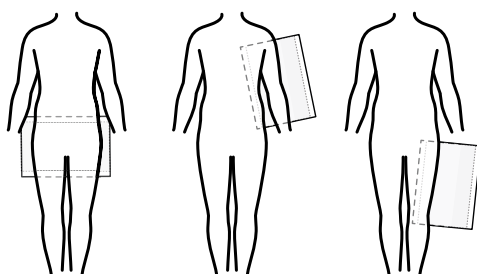

DryMax Comfort handles fluids in an efficient way whilst patients are cared for in hospital and examination beds, chairs and ambulances.

DryMax Comfort provides the patient with a drier and more comfortable environment. It prevents the patient getting wet which assists in maintaining the patient's warmth and comfort.

Thanks to the convenient size of DryMax Comfort it can easily be replaced when needed, lessening the need for frequent changes of bed linen and limiting the need for patient movement.

As DryMax Comfort absorbs and retains contaminated fluids to the products core constructed by our DryMax Technology, it contributes to infection control and eases the cleaning process.

Example of area of use:

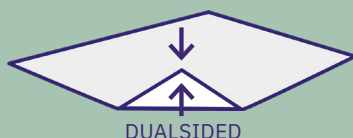

AREA OF USE
