

DryMax Floor mat Triple

DryMax Floor mat Triple is a 3-part superabsorbent mat. It can be folded in different configurations or unfolded so that it sits alongside an entire operating table. DryMax Floor mat Triple is capable of absorbing and retaining up to 6 litres of saline solution.

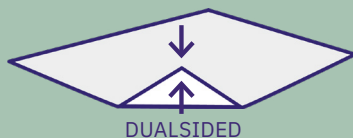

Place it in front of or beside the feet of the surgical team. During absorption, the mat swells and its contents turn to gel.

The mat is dual-sided and can be placed on floors that are already wet. If required, additional mats can be added or the product can be used in conjunction with DryMax Floor mat 2.4 to provide extra absorption.

Proper fluid management promotes Health and Safety as it reduces the risk of slips and trips and provides a cleaner and safer working environment.

As DryMax Floor mat Triple locks in the contaminated fluids without dripping, it helps reduce the risk of spreading contaminants. In this way, the mat contributes to hygiene control and staff safety.

Cleaning times and costs are also significantly reduced as fluids are absorbed and retained by the mat.

DISPOSAL
Treat as clinical waste, combustion forms carbon dioxide and water

**NOT
MEDICAL
DEVICE**

**NON
STERILE**

Item	Product size (cm)	REF	Pcs / box	Packaging	Absorption capacity (l)	
					Tap water (l)	NaCl 0.9% (l)
DryMax Floor mat Triple	216 x 37	F20243	40	40 pcs/box	15	6

Absorb water-based liquids such as saline, urine, amniotic fluids and blood. In the case of liquids containing bodily fluids and proteins, the absorption capacity will decrease compared to the saline data provided.

AREA OF USE

- Operating room
- Examination room
- Gynecology
- Urology
- Emergency room
- Ambulance
- Body bag

PRODUCT BENEFITS

- Staff safety
- Hygiene control
- Faster turnover
- High absorbency
- 3-part design
- Flexible folding
- Dual-sided
- Locks in fluid (no dripping)
